www.senator.com

senator®
Made in Germany. Since 1920.

S-08WM05002026UK English

Valid from Jan. 01, 2026

All prices are industrial prices and are to be understood as recommended selling price in GBP per piece, ex works, excluding VAT and remain valid provided that the economic environment remains stable. Whilst our catalogues are prepared with utmost care SENATOR GmbH cannot guarantee the completeness and accuracy of the information provided. Our general terms apply. You will find these at www.senator.com

Dear Valued Customer,

Thank you for choosing senator® and for placing your trust in us. This commitment guides our actions to provide you with clear and dependable solutions across all areas.

As a German family business with a long tradition and our own production, we place the highest value on customer satisfaction. For decades, we have embodied quality "Made in Germany" – with experience, passion and an innovative spirit.

With Simple. Excellent. Done. we stand for cooperation that lasts – with products, processes and people you can rely on.

This commitment guides our actions, enabling us to provide you with clear and dependable solutions in all areas.

Simple
We focus on what makes an impact.
At senator, everything revolves around two things: writing instruments and mugs. Two products that make brands visible in everyday life – through clear design, long-lasting use and genuine presence.

Excellent
We manufacture in Germany – at our own site, using state-of-the-art technology and decades of experience.
High-quality materials, precise workmanship and controlled processes are a matter of course for us. Quality, to us, is a matter of responsibility – towards customers, people and resources.

Done
We deliver what we promise.
Customer proximity, clear communication and reliable processes ensure that projects run smoothly – from the first conversation to delivery. Direct, solution-oriented and cooperative.

With this catalogue, we offer not just products but solutions that are specially designed to meet your needs, ensuring successful collaboration now and in the future.

We look forward to continuing our successful partnership.

Sincerely,

Daniel Jeschonowski
Group CEO Senator

MANUFACTURING COMPETENCE

SIMPLE. EXCELLENT. DONE.

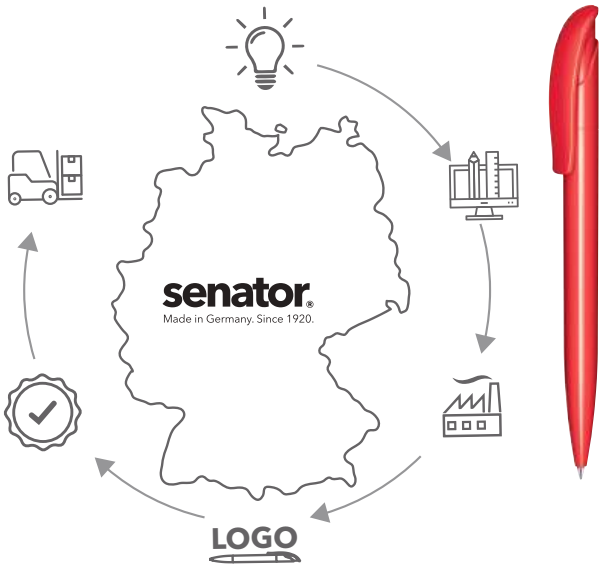
MADE IN GERMANY.

Senator has stood for quality and reliability for over 100 years. We are just as committed to these attributes as we are to the essential issue of responsibility for our environment and future generations.

MADE IN GERMANY

COMPLETE VALUE CHAIN IN GERMANY

All senator® plastic pens are fully produced in Germany using 100% Green electricity. For us, "Made in Germany" goes far beyond mere advertising and encompasses the entire value chain from **design** and **development, injection moulding, assembly** and **printing** to **logistics** and **quality assurance.**
This means we know exactly which raw materials go into every single writing instrument.



Your advantages with senator®:

- Short transport distances and proximity to the market
- Safe and durable products
- High and uniform quality standards
- Extensive know-how with experienced employees
- Flexibility in product development

With each of our writing instruments, we achieve a leading CO_2 footprint in the industry per metre of writing length, because **in terms of ecological footprint, a product "Made in Germany" clearly exceeds other imported products.**

Senator® products are always the safe choice and fulfil all legal requirements. To us, the Sedex membership is as self-evident as the certification according to ISO 9001 and 14001.

FS 825072 EMS 825070

SENATOR® ENVIRONMENT MANAGEMENT

A healthy environment plays a major role for us. That is why we pay special attention to sustainable materials and production processes, ecological compatibility, waste avoidance, resource conservation and recycling.

For example, we only purchase green electricity from hydropower and at the same time invest in electricity-saving measures at our production site.

When it comes to climate protection, we focus on quality, transparency and clear standards. Durable products extend the usage cycle and thus reduce the use of new resources. Our supply chains are regularly audited to ensure social and environmental criteria are met. Certified environmental and quality management systems help us to measure improvements and make responsibility binding.

Through open communication about origin, use of materials and manufacturing processes, we create traceable sustainability – from the idea to the finished product.

CUSTOMISED COLOURS

MIX & MATCH SERVICE

Would you like a different colour combination for your favourite pen? Then the senator® Mix & Match service is just right for you. Combine the colours of our catalogue products freely according to your wishes and your corporate design. Parts of the different finishes polished, matt, clear and frosted can also be freely combined with each other and even supplemented with a metal tip if available.

We produce all plastic parts ourselves. This means that we can produce and combine the parts in the corresponding colours for you from a quantity **of 10,000 pieces**. This opens up almost **limitless possibilities** for your very own personalised ball pens.

An example:

The Bridge model consists of 3 parts, each of which is available in 15 colours, with the tip additionally available in a metal version.

This opens up 3,600 possible combinations for this model. And all that **at no extra charge.**

On request, you can combine selected plastic writing instruments in any of our standard colours from 10,000 pieces.

We will also be happy to help you select your desired model.
Please contact us.

Examples for Mix & Match combinations:

CUSTOMISED COLOURS

MADE IN GERMANY

COLOURING ACCORDING TO PMS SPECIFICATION

You can't find your desired colour among our catalogue products? Then use the senator® PMS service.

Tell us the PANTONE® number of your desired colour and we will produce the pen or just a specific part in your **very own personal shade**.

This is possible from a quantity of 10,000 pieces.

For approval we will send you a sample plate made in the desired colour.

Our colour references always refer to the PANTONE® Matching System, however we must point out that the product itself – because of different surfaces, lighting and materials – can differ from the colour tone printed on paper. This is why we cannot accept complaints for such deviations.

PMS
Peach
Fuzz

PMS
Rhodamine
Red

PMS
Veri
Peri

Special logo colours that deviate from the standard are just as easy to reproduce as colours for seasonal advertising campaigns. Be creative!

This service is available for all plastic pens.

For price information please see page 101.

FAST DELIVERY SERVICES

CONNECTED PENS

BALL PENS WITH QR CODE

The senator® QR code ball pens offer you another option for a quick and contactless transfer of additional information.

QR codes have been established as a printing option at senator® for several years. Now, new and revolutionary applications can be linked with QR codes.

Also possible on coloured and transparent clips as long as the print colour is of sufficient contrast to the clip colour.

THE SENATOR® QR CODE PEN PACKAGE

1. Send us the **link of your choice** for your personalised QR code when placing your order.
2. We create your very own QR code, according to CI specifications and the **best possible readability.**
3. We print the QR code in best digital print quality, **without additional costs.***
4. The ball pen is then **immediately ready for use.**

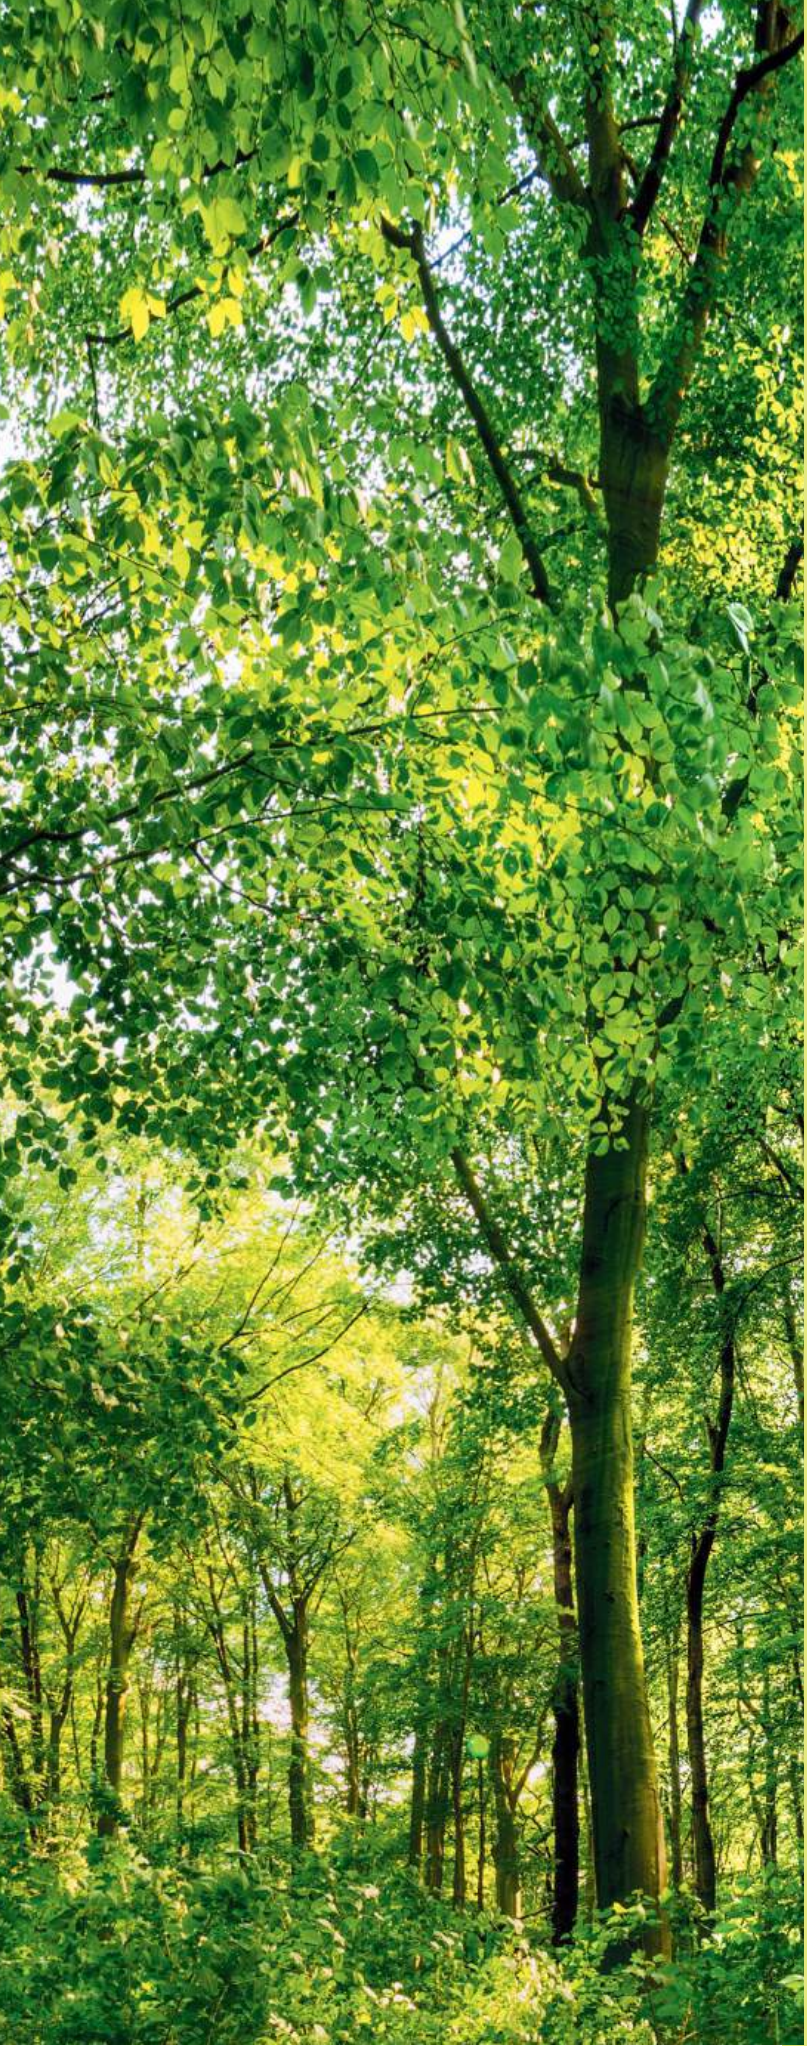
EXAMPLE APPLICATIONS

- **Business cards**
  With all important contact information including a call function
- **WiFi Connection**
  With direct access to the corresponding WiFi network (e.g. hotel industry)
- **Social Media Channels**
  All information/news on your product and service range
- **Events**
  Announce your trade fairs with all important data

*The QR code is equivalent to a digital print on the clip and can also be applied as part of your logo print at **no extra cost.**

MODELS

These items can easily be provided with a QR code print on the clip.



BIOBASED AND RECYCLED PLASTICS

SIMPLE. EXCELLENT. ~~DONE.~~ SUSTAINABLE.

At senator® we actively follow the latest Research and Development in alternative materials to reduce the CO_2 footprint and see these developments very positively!

- We produce five successful ball pen models from bio-based plastic made from sugar cane
- Our range also includes five models made from post-industrial recycled plastic.
- We also recycle the production waste from our bio-based ball pens and use it to produce new ball pens

MADE IN GERMANY

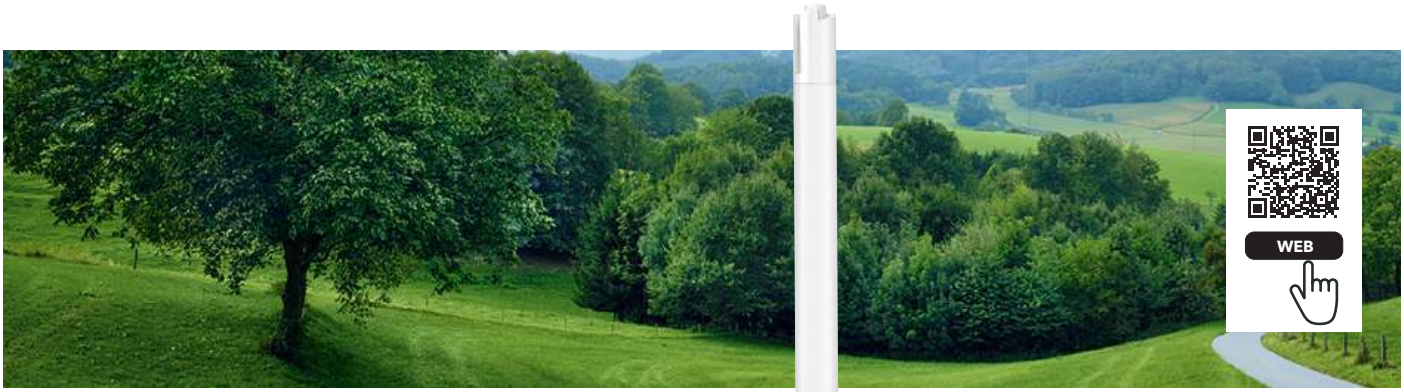
MADE IN GERMANY

BIOBASED PLASTICS AND RECYCLED PLASTICS

		Source	Material basis	Core characteristics	CO_2 footprint
BIO BASED					
BIOBASED PLASTICS (PLA)	We use a PLA based on renewable resources for our bio products. Our PLA is made from sugar cane. One of the most efficient raw materials for PLA production.	Renewable raw material with a biobasis	PLA (poly lactic acid from sugar cane)	Pleasant feel and natural colours	CO_2 reduced, as up to85 % is organic / renewable
100 % R-ABS RECYCLED MATERIAL					
RECYCLED PLASTICS (R-ABS)	We use an ABS recompound based on >95% recycled material. This means reusing industrial production remnants and waste, returns and everyday products.	Genuinely recycled plastic from durable articles	ABS (Thermoplastic material)	High-quality surfaces	Up to 75 % less CO_2 compared to new ABS plastic
100 % R-PLA RECYCLED MATERIAL					
RECYCLED BIOBASED PLASTICS (R-ABS)	We use a PLA based on renewable resources for our bio products. The production waste from our bio-products made with this material is repurposed to craft the senator "Melbi" ballpoint pen.	Renewable raw material with a biobasis, recycled	PLA (poly lactic acid from sugar cane)	Pleasant feel	CO_2 reduced, as up to85 % is organic / renewable

REFILLS

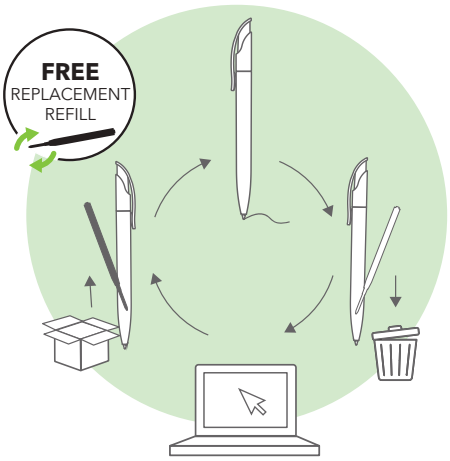
FREE REPLACEMENT REFILL



Once the refill is empty, it is easy to extend its life span. We offer all users of our writing instruments from Europe the opportunity to order a free replacement refill via our website **refills.senator.com**. You only pay a shipping fee of 1 €.

This avoids waste, protects the environment and extends the advertising life of your ball pen many times over.

refills.senator.com



senator® magic flow

A high quality refill ensures a more pleasurable writing experience and guarantees higher levels of exposure and a better economic return for brands. As a specialist in plastics processing, we also produce our X20 and G2 plastic refills **in our own factory in Germany.**

The **senator® magic flow G2** refill belongs to the best of its class:

- **High class quality ball point**
- **Compliant** to ISO-12757-2 and tested under stringent quality criteria to the highest standards
- **In two sizes:**
  1.0 mm for all who prefer a clear and fine line
  1.4 mm for all those who love more ink flow and thus even smoother writing
- Thanks to the quality ballpoint and **premium-quality German ink** the writing is exceptionally smooth and even
- Our refill promise: **up to 5 years of writing power** of our G2 refills
- All senator® refills are, of course, **lead-free.**

8062 **senator® magic flow X20 refill (1.0 mm)**
Blue or black, writing length up to 2 km

8004 **senator® magic flow G2 refill (1.0 mm)**
Blue or black, writing length up to 5 km

8080 **senator® magic flow G2 refill (1.4 mm)**
Blue or black, writing length up to 3.5 km

8068 **senator® magic flow metal refill, G2**
Blue or black, writing length up to 8.5 km

BRANDING POSSIBILITIES

SIMPLE. EXCELLENT. DONE. INDIVIDUAL.

We are masters of a wide range of printing processes and also develop and invest in highly specialised machines of the future.

- 2,600 m² printing plant in Germany
- Own printing plants in France and Great Britain
- Various printing processes, perfectly customised to your logo and your selected product

PRINTED IN GERMANY

BRANDING METHODS

CMYK PRINT

DIGITAL PRINT

Our digital print is the perfect solution to apply multicoloured prints on the clips or barrels of our ball pens. With this method we also place logos very effectively onto the cap of our Liberty models.

Technology:

The digital print uses the CMYK colour printing process to mix all colours from the basic four. For prints on coloured backgrounds we apply an extra layer of white underneath the print.

Strengths:

- Print to the edge of the clip
- Realisation of colour gradients
- Also suitable for photo-realistic themes

DIGITAL PRINT WITH 3D EFFECT

On many white barrels of our writing instruments, large-area digital prints can be supplemented with a haptic effect. Give your brand presentation noticeably more structure and shine.

Technology:

The digital print uses the CMYK colour printing process to mix all colours from the basic four. An additional lacquer layer is added on top of the print for a high-gloss raised feel effect.
Minimum quantity: 1,000 pieces

Strengths:

- Incomparable 3D effect
- Realisation of complex colour gradients
- Reproduction of countless colours

1C – 5C PRINT

ENGRAVING

1C – 5C PRINT

Whenever it comes to branding our ball pen barrels, screen print is the branding method of our choice. For the curved clips, on the other hand, we use tampo printing. Both processes ensure optimal implementation of your brand message.

Technology:

Screen print is a direct print process whereby ink is pressed through a mesh onto the ball pen. Tampo print is an indirect print method whereby ink is transferred from the cliché via a silicone pad onto the surface to be printed.

Strengths:

- Particularly sharp-edged prints
- Accurate full colour prints possible
- Multicolour prints possible

LASER ENGRAVING

A very elegant branding method on metal surfaces. Logos or messages are very accurately and permanently worked into the metal surface.

Technology:

For our laser engraving we use a high precision computer-controlled laser which engraves the surface of our writing instruments and thus expose the metal layer underneath.

Strengths:

- A high-class and modest result
- Extremely durable
- Suitable for individual names

BRANDING METHODS

CMYK PRINT

CHRYSTAL PRINT

SUBLIMATION

We offer this impressive branding method for a total of 8 different mug designs and King Can.

Technology:

The sublimation process uses pressure and heat to transfer the graphic onto a specially coated mug.

Strengths:

- High colour variety and brilliance
- Photo realistice prints possible

CHRYSTAL PRINT

With Chrystal Print branding, you're choosing an elegant combination of matt and glossy surfaces. The precise application of a clear varnish onto a matt background creates striking contrasts and gives your mug a refined, shimmering effect that instantly catches the eye.

Technology:

With Chrystal Print, a transparent gloss varnish is applied with pinpoint accuracy to a matte surface. This creates glossy highlights that shift subtly depending on the light, adding depth and visual interest.

Strengths:

- Glossy accents on a matte surface
- Elegant light reflections with a sense of depth
- Subtle yet impactful brand presence

1C – 5C PRINT

ENGRAVING

DIRECT PRINT

The direct printing process saves time and money. We print without raster and thus achieve rich, vibrant colours.

Technology:

The direct printing process does not require an intermediate step via a carrier material. The ink is applied directly to the mug without any detours.

Strengths:

- Short delivery times
- Cost-effective branding method
- Up to 5 colour prints possible

ENGRAVING

Engraving offers a high-quality and particularly durable finish. Logos or messages are very accurately and permanently worked into the surface.

Technology:

A computer-controlled laser engraves a logo or imprint into the item ensuring absolute definition and longlasting branding.

Strengths:

- Striking tactile results
- Understated quality
- Precise reproduction of logos and lettering

ARTWORK

GENERAL INFORMATION

Please send us your artwork in the below mentioned file types or send text in on of our standard typefaces.

Please also provide a print sample or proof if possible.

Please send logos and text as vectorised files or as TIF-files with 1200 dpi, in case of photos we require a resolution of 600 dpi.

Vectorised logos can be scaled without any loss in quality and are to be preferred against pixel files.

Below mentioned minimum font sizes and minimum line widths are guidelines only. Depending on the motive, branding method or product surface smaller letters and finer lines might be possible or larger letters or bigger lines might be necessary.

Proof samples
To make sure you get the best possible result we recommend the production of a sample for approval. (For production reasons slight colour deviations between a print on paper and a print on other materials are unavoidable).

File formats
Adobe Photoshop CC 2025
Adobe Illustrator CC 2025
Adobe Indesign CC 2025
Corel Draw X8
(Please convert all texts into curves)

PENS

Print colours
With the available colour shade mixing range, all Pantone C and HBP K shades can be mixed. Slight colour shade deviations between paper flags and print are unavoidable on white underground. Major colour shade deviations on an underground of a different colour shade or on a dark-shaded underground must be tolerated.

Digital print
All colours are mixed in CMYK, so it is not possible to print real PMS colours. In nearly every case the colours will be close to. Very large, uni coloured surfaces cannot be realised. Minimum size: 8 pt, minimum line width: 0.15 mm

Laser engraving
Minimum line width: 0.15 mm, Minimum front size: 6 pt

Personalisation (list of names)
Many of our products can be customised with the personal name. Please send us the names in an excel file.

Raster
Screen print: Raster of 40, colour intensity 15 - 85%.
360° barrel print: Raster of 48, colour intensity 15 - 85%

Standard Typefaces
Arial, AvantGarde, Courier, Futura, Present, Serifa, Helvetica, Times New Roman, Univers each regular, bold, italic, bold italic, BrushScript, English script tye each italic and bold italic. Other typefaces possible (only PC), please send font as True Type-face (*ttf).
Other or similar typefaces on request.

MUGS

Direct Print
Minimum size 10 pt, minimum line width 0.25 mm, no raster
Due to their nature, the printing colours are not completely opaque. This means that the colour will generally appear darker on dark backgrounds.

Transfer print
Minimum size 8 pt, minimum line width 0.2 mm, printable colour intensity 15 - 85 %
